

Changes to Your Vanguard Homepage

Vanguard is redesigning your homepage at vanguard.com/retirementplans to make it easier for you to prepare for retirement.

When you log on, you'll see that your new homepage is streamlined to give you an individualized and instantaneous picture of your retirement readiness that will answer three essential questions:

- **How much do you have?** Your balance will be clearly shown as soon as you log on.
- **How are you doing?** You'll get a means of assessing your retirement readiness.
- **What should you do next?** You'll get an instant suggestion for a possible “next best action,” or some additional information, to consider to help you get — and stay — on track for retirement.

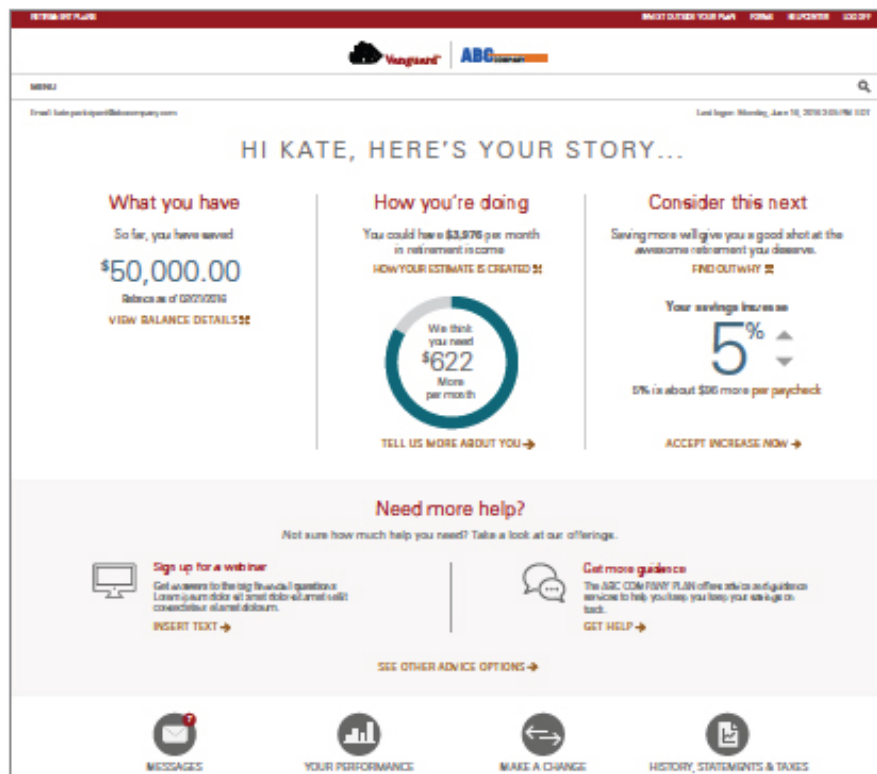

Accessible From Any Device

Your new homepage can be accessed from any device (desktop, laptop, tablet, phone) whenever and wherever you want. And all the features that you've grown accustomed to — your messages, your performance updates, your account history — will still be there.

Plus, we'll adopt a “test and learn” approach to the experience so we can continue to refine your homepage based on what we discover.

Get set for a new way of looking at retirement in 2017!
